- Postman, Swagger, SoapUI, Charles, Fiddler, JMeter
- OracleSQL, MSSQL, PostgreSQL
- JSON, XML, JRXML
- IntelliJ IDEA, Android Studio, VS Code, Jasper Studio
- Windows, Linux, Git, GitLab, SVN
- DevTools, Figma

Industries

Banking, Fintech

Work Experience as QA Engineer at “Isida-Informatica”, LLC

PROJECTS

[Bank.FinArchive](#) (link)

(Dec 2019 - [Current](#))

The application is designed for the formation, use and storage of various banking documents in electronic form.

Responsibilities

- Interaction with the developers to communicate the defects and actively participate in replicating the bugs and holding demo presentations
- Requirements clarification, definition and analysis
- Test process planning (test strategy and test plan preparation, estimation and prioritization)
- Reviewing, editing, adding and improving test cases
- Functional testing
- Non-functional testing
- API testing
- Smoke testing
- GUI testing
- Regression testing
- Cross-device testing
- Team cross review
- Bug reporting and defects validation

Additional work in project:

- API testing automation with Postman + JS
- Testing automation with Java + Selenium + Allure

Technologies and tools

- Mantis, Youtrack, Postman, SoupUI, OracleSQL, PostgreSQL, XML, JSON, IntelliJ IDEA, VS Code, Jasper Studio, Chrome DevTools, IBM MQ, Git, SVN, TeamCity, Figma

ISIDA Audit (link)

(Apr 2020 – Jan 2021)

The application for managing internal audit processes at an enterprise, in a bank.

Responsibilities

- Interaction with the developers to communicate the defects and actively participate in replicating the bugs and holding demo presentations
- Requirements clarification, definition and analysis
- Reviewing, editing, adding and improving test cases
- Functional testing
- Non-functional testing
- Integration testing
- Smoke testing
- GUI testing
- Regression testing
- Cross-device testing
- Team cross review
- Bug reporting and defects validation

Additional work in project:

- Localization of the application into English (front: PrimeFaces, back: Java)

Technologies and tools

- Mantis, Youtrack, MSSQL, JSON, IntelliJ IDEA, VS Code, Jasper Studio, Chrome DevTools, Git, SVN, TeamCity

[Bank.ORM](#) (link)

(Jan 2021 – Aug 2021)

The application is designed to maintain a database of operational risk events, perform operational risk management procedures.

Responsibilities

- Interaction with the developers to communicate the defects and actively participate in replicating the bugs and holding demo presentations
- Requirements clarification, definition and analysis
- Test process planning (test strategy and test plan preparation, estimation and prioritization)
- Reviewing, editing, adding and improving test cases
- Functional testing
- Non-functional testing
- API testing
- Integration testing
- Smoke testing
- GUI testing
- Regression testing
- Cross-device testing
- Team cross review
- Bug reporting and defects validation

Additional work in project:

- API testing automation with Postman + JS
- Testing automation with Java + Selenium + Allure

Technologies and tools

- Youtrack, Postman, OracleSQL, XML, JSON, IntelliJ IDEA, Jasper Studio, Chrome DevTools, Git, TeamCity, Figma
